Professional Summary

Computer Science Pre-Final Year student with production experience building and deploying scalable backend systems using Java, C++, and Python, with hands-on ownership of CI/CD pipelines, automated testing, and cloud deployment. AWS Certified, with experience in distributed API design and secure, monitored production systems.

Education

Bennett University

Aug 2024 – Jun 2028

B.Tech Computer Science Engineering

CGPA: **8.62 / 10**

Relevant Coursework: Data Structures & Algorithms, Algorithm Complexity Analysis, Operating Systems, Computer Networks, DBMS, Object-Oriented Design

Technical Skills

Languages: C++, Java, Python, JavaScript/TypeScript, SQL

Backend & Core Systems: Spring Boot, FastAPI, Node.js, REST/WebSockets, Microservices, Concurrency, JWT/RBAC

Data & Infrastructure: PostgreSQL, MongoDB, AWS, GCP, Docker, Linux, CI/CD Pipelines, Object Storage

Frontend: HTML5, CSS3, React.js, Next.js, Tailwind CSS

Technical Experience

Backend Engineering Intern — Centre for Innovation & Entrepreneurship, Bennett University Jul 2026 – Present

- Designed and deployed secure, scalable REST and GraphQL APIs using Node.js for distributed university platforms within an Agile/Scrum workflow, implementing OAuth2/JWT access control and building a GitHub Actions CI/CD pipeline with automated linting, unit/integration testing (Jest, Supertest), and dependency vulnerability scanning.
- Automated production deployments via Vercel with environment-specific configuration, health-check verification, and rollback capability; monitored post-deploy errors using Sentry to ensure platform reliability.

Project Intern (Software Engineering) — Sequoia Insilico Pvt. Ltd. | BIRAC-Backed May 2026 – Jul 2026

- Built and deployed 2 production systems within an Agile/Scrum environment using React and Node.js — refactored **Sequoia Insilico's** ([Website](#)) frontend to a modular architecture and engineered **LifeBack** ([Website](#)), a clinical SaaS for PHQ-9 and voice-based mental health assessments.
- Architected a scalable event-driven backend utilizing serverless queues and object storage to securely process & analyze patient audio streams in real-time, and contributed to a research literature review on ML-based screening methods

Projects

NetSentry-DPI — Multi-threaded Deep Packet Inspection Engine

[\[GitHub\]](#)

Tech: C++17, Multi-threading, PCAP, TLS/SNI, Consistent Hashing, Lock-free Design

- Built a flow-aware packet inspection pipeline processing TCP/UDP/TLS traffic across 4 concurrent Fast Path workers by implementing consistent hash-based routing and worker-local flow tables to eliminate inter-thread lock contention.
- Achieved zero cross-thread flow state synchronization by assigning flow affinity via 5-tuple consistent hashing, enabling parallel classification of HTTPS, DNS, and application-layer traffic with rule-based drop/forward decisions.

Zorvyn — Finance Data Processing Backend

[\[GitHub\]](#)

Tech: Java 21, Spring Boot 4, PostgreSQL 15, Spring Security 6, JdbcTemplate, Docker Compose

- Architected a modular monolith with CQRS analytics, concurrent request handling via stateless Spring Security 6 RBAC across 3 user roles, and Hibernate soft-deletion for audit trails — containerised via Docker Compose.

Certifications

AWS Certified Solutions Architect – Associate — Amazon Web Services

Apr 2026

Validation: `b45b2d12c20145a6afb2811fbee758d1` | Valid through Apr 2029

IBM Generative AI Engineering — Coursera Professional Certificate (16 courses)

Mar 2026

Achievements

- 1st Place** — Hack Auction, Infuturum 4.0 (ACM Bennett University).
- Top 3% Globally** — GSSoC 2026 — Ranked #1,307 out of 43,566 participants.
- Solved **200+ DSA problems** on LeetCode — Contest Rating **1414**, 100-Day Badge.

Leadership & Responsibilities

President — Dean Career Cloud, SCSET, Bennett University

Feb 2026 – Present

- Leading recruiter engagement and placement-readiness programs impacting 2000+ students across SCSET.

Head of Technology — GeeksforGeeks Student Chapter, Bennett University

Nov 2025 – May 2026

- Organised 5+ technical workshops and 2 DSA contests reaching 1000+ students while leading a 15-member team.

Mentor — GirlScript Summer of Code (GSSoC) 2026 | AI Agents Track

May 2026 – Present

- Mentoring open-source contributors on scalable software development, PR reviews, and Git workflows.
